

Year 2

Presenting Ideas

Key Learning

- To understand that ideas can be organised and presented using a concept map.
- To add information to a concept map.
- To organise ideas clearly in a concept map.
- To use a concept map to present ideas to others.

Key Resources

2Connect

Key Vocabulary

Concept Map

A diagram that helps us organise ideas and show how they are linked together.

Group

A set of things that belong together because they are similar.

Present

To share your ideas with other people so they can understand them.

Connecting Line

A line that joins ideas together to show how they are connected.

Layer

A level of ideas in a concept map.

Title

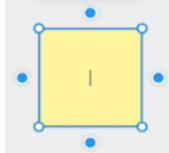

The name of the work that tells us what it is about.

Node

A box or bubble that holds one idea.

Key Images

Node

Key Questions

What is a concept map and how does it help us present ideas?

A concept map is a diagram that uses nodes and connecting lines to organise ideas. It helps us present ideas by showing how they are linked, making our thinking clear and easier for others to understand and remember important information.

How can you make a concept map clear and easy to understand?

You can make a concept map clear by grouping related ideas, using colour to show links, and organising ideas into layers. Connecting lines should show how ideas relate so the information is easy to follow and makes sense to the reader.

How should you present your concept map so others can understand your ideas?

You should speak clearly, explain one idea at a time, and look at your audience. Listen carefully to others and give kind feedback so everyone can understand the ideas being shared.
